THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

1. All claims are allowed over the prior art of record.

Response: Amendment

2. Applicants are thanked for properly addressing the issues raised during the interview and the cursory review of proposed amendments, which took place on March 10th, 2009 (entered into record on 3/25/2009), in the amendments filed on March 23rd, 2009.
3. All objections and rejections have been properly addressed and the respective objections and rejections have been withdrawn.
4. All claims are deemed statutory in view of paragraph 14 and 15 of Office Action dated 10/28/2008.

Allowable Subject Matter

5. The following is the Examiner's statement of reasons for allowance:
6. As per claim 1, the most relevant prior-art of record is Lee in view of Sun in further view of Kadkade and further in view of Karchi that discloses the claim as set-forth in Office Action dated 10/28/2008.
7. The prior art does not explicitly disclose or suggest limitations (a), and (c), in combination with the testing of non-deterministic states as recited in the claims, with emphasis to underlined portions below.

The claim is disclosed as following in the Specification:

28. (New) A tangible computer-readable storage medium having thereon computer-executable instructions for performing a method of creating test coverage for non-deterministic programs within a testing environment, the method comprising:

in a computer, receiving a graph of edges and states representing a program under test (**PGPUB: 0025**), the states comprising a plurality of deterministic states controllable by the testing environment and a plurality of non-deterministic states uncontrollable by the testing environment, wherein a plurality of the edges represent non-deterministic choices associated with at least one of the non-deterministic states and the edges representing non-deterministic choices are assigned respective probabilities;

Art Unit: 2128

with a Chinese Postman tour technique **(0025)**, creating a continuous cycle of edges and states through the graph that reaches states in the graph at least once;

splitting the continuous cycle into discrete sequences so the discrete sequences end with a non-deterministic state **(0043; 0048)**;

executing the program under test under test conditions as a first execution of the program; determining discrete sequences not reached by the first execution of the program; determining untested states as states in the discrete sequences not reached by the first execution of the program **(0045)**;

creating strategies through the graph to reach the untested states, wherein creating strategies comprises (a), (b), and (c):

(a) starting from a given untested state out of the untested states, traversing the graph backwards and computing costs and probabilities at states with a respective edge reaching the given untested state, wherein probabilities are assigned based on likelihood that an edge exiting a respective non-deterministic state uncontrollable by the testing environment will be selected during execution **(0046)**;

(b) assigning probabilities and costs to respective vertices based on a probability of providing a path to the given untested state **(0023)**; and

(c) choosing vertices such that a next state with a lower cost and higher probability is preferred over a next state with higher cost and lower probability **(0050)**, wherein the

strategies comprise respective series of one or more edge transitions through the graph; storing a representation of the created strategies in computer memory; and in the computer, executing the program under test under test conditions as a subsequent execution of the program to the first, the subsequent execution using the created strategies such that the subsequent execution has a higher probability than the first execution of the program to execute through states that correspond to the untested states, wherein the subsequent execution repeats at least one of the strategies and presents the non-deterministic choices from at least one of the non-deterministic states a plurality of times during the subsequent execution, whereby a possibility of reaching at least one of the untested states is increased **(0053)**.

Art Unit: 2128

The art of record, either individually or in combination, fails to teach, suggest, or render obvious invention having the corresponding function that is claimed. In view of the foregoing, the Instant Claims of the present application are found to be patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

All claims are found allowable over prior-art.
